Imagine a mobile transceiver only 4.5" wide, 1.4" high, and 5.75" deep - miniaturized circuitry yielding full-size performance

The 23-channel Brute with full legal power output, positive or negative ground, is compact enough to fit virtually anywhere — under the dash, in a glove compartment, or in the smallest sports car

Despite its small size, the Brute is a highly sophisticated performer, engineered without compromise and assembled with painstaking care. And since it's made by SBE, it's as rugged as it is refined. Engineering highlights include sharp selectivity, full audio output into an oversized built-in speaker, and jacks for both PA and external speakers. The tar-n-channel selector is night-lighted for easy viewing, and a red transmit light indicates on-the-air operation.

The Brute, fully synthesized for maximum performance, is just one more reason why SBE is your best choice for the best in CB
